

# Athena

Labcorp's simple implementation reduces the burden on your IT team. End-to-end, the project can take less than a week. In that time, **your effort may be limited to under an hour.**

1. **Labcorp completes the initial customer configuration.**
2. **Labcorp completes and submits the consent and authorization order form on your behalf.**
3. **Athena authorizes Diagnostic Assistant for you (typically, a 1- to 3-day turnaround). You will receive an email of completed authorization.**
4. **You activate Diagnostic Assistant.**
  - A. Select **Practice Manager** from Admin settings
  - B. Click **Embedded App User Subscriptions** under Practice Links
  - C. Click the **pencil icon** or **drop-down caret** (depending on your version of Athena) next to Labcorp Diagnostic Assistant on the Settings tab of Configure Embedded App Access Modes
  - D. Select **Turn app ON for All users** or **Turn app ON for Subscribed users**, according to your practice guidelines for enabling users
  - E. Click **Submit**

**If turning on for subscribed users:**

  - A. Navigate to the **User Subscriptions** tab of Configure Embedded App Access Modes
  - B. Click **Add User Subscription**
  - C. Select the appropriate usernames
  - D. Click **Submit**
